INDEX.

Actinias, two new species, 92
Africa (Southern), Report on, by the Rev. Dr D. Livingston, 355
African Tribes, 383.
Ægilops, triticoidal form of, by Professor Henslow, 345
Ægilops triticoides, 379.
Ajuh of Central Africa, described by Dr Vogel, 345
Albumen in Calico Printing, 206
Antimony, equivalent of, 191
Apes, Fossil, 371
Arsenical Pyrites and Iron, 198
Atlantic Ocean, Deep Soundings of, 179
Anemometer, Self-Registering, by Mr Beckley, 329
Aytoun, Lieutenant A., Geology of the Southern Concan, 67

Baker, J. G., Classification of Plants of Britain, according to their Geognostic Relations, reviewed, 143
Balæniceps rex, Remarks on, 101
Baxter, H. F., on Electricity in Plants, 49
Blood, Fluidity of, by Dr Richardson, 347
Blyth on Lignites of Giant's Causeway and of Mull, 304
Bojer, Professor, his death, 388
Boracite, 198
Botanical Intelligence, 192, 372
Botanical Garden at Cirencester, Experiments conducted in, by Professor Buckman, 344
Botanical Society of Edinburgh, Proceedings of, 168, 362
British Association Reports, 328
Bryson, Alexander, Exposition of the Mechanical Inventions of Dr Robert Hooke, 12
Buckland, Dr, his death, 388

Cadmium Salts, 94
Carnallite, a new mineral, 197
Central Africa, Inland Sea of, 382
Chalk Formation, Siliceous Bodies in it, by F. S. Bowerbank, 339
Chemical Intelligence, 191, 379
Coloured Light, Unequal Sensibility of the *Foramen Centrale* to, by Professor J. C. Maxwell, 337
Colours, Theory of Compound, by Professor J. C. Maxwell, 335
Cousland, Dominick, Sermons in Stones, reviewed, 142
Cretaceous Ocean, its Depth, 185
Crimean Fossils described, by W. H. Baily, 310
Cuneiform character, its plastic origin, by J. W. J. Nasmyth, 355
Cydippe pomiformis, reproduction of, 85

Dareste Camille, on the Organized Bodies which give a Red Colour to the Sea, 262

XUM

Davy, Dr John, Experiments on certain Edible Sea-Weeds, 1
Devonian strata of South of Ireland, 64
Diatomaceæ, Fossil, 196
Dichodon cuspidatus, described by Professor Owen, 338
Dichromatic Phenomena among Solutions, by Dr Gladstone, 331
Dredging Observations, Hints regarding, 206

Echeneis, new species of, by Andrew Murray, 287
Edible nests of Swallows, 178
Eggs, composition of, 177
Electricity in Plants, 49
Electrical and Magnetic Forces, law of, by Sir W. S. Harris, 330
Embryogeny in Plants, Schleiden's views of, 344

Fibres of Wood, their direction, by Professor Braun, 376
Fungus in Fens of Cambridgeshire, 196

Galletly, J., on the Double Salts of Cadmium and the Organic Bases, 94
Geographical Distribution of Plants, 372
Geology of Southern Concan, India, 67
Geological Intelligence, 179
Gold District of the Cape of Good Hope, 181
Gold Fields of California, extent of, 187
Gold, Statistics of, 189
Grooving and Polishing of Hard Rocks, 186
Gourlie, William, his death reported, 366.
Guano, Birds forming it, 178

Hairs on Oleaceæ and Jasminaceæ, 375
Harkness, Professor Robert, on Scalariform Tissue in Devonian Strata, 64. On the Lignites of the Giant's Causeway and of Mull, 304
Hay on the Science of Beauty, reviewed, 121
Henwood, W. J., on the Rock-Basons at Deo Dhoora, near Almorah, in Upper India, 204
Hooke, Robert, Mechanical Inventions of, 12

Ichthyosauri and Teleosauri, food of, by Mr Moore, 343
Iron, Manufacture of, without fuel, by W. Bessamer, 357

Lees, Edwin, Pictures of Nature reviewed, 143
Lichens of Ben Lawers, 27
Life of Plants, duration of, by Professor Fleming, 362
Lignites of the Giant's Causeway and the Isle of Mull, by Professors Harkness and Blyth, 304
Loganiaceæ, Notes on, by Bentham, 377
Luminous Meteors, Professor Powell on, 328

Macmillan, Hugh, on the Rare Lichens of Ben Lawers, 27
Madden, Colonel, his death reported, 365
Magnesian Limestone, remarks on its production, by H. C. Sorby, 338
Malvern District, some phenomena in the, by Rev. W. S. Symonds, 339
Martin, John, on the Northern Drift, 209

Meteorological Association of Scotland, 199
Meteorological Intelligence, 199
Mica-Schist, Microscopical Structure of, by H. C. Sorby, 339
Mineralogical Intelligence, 196
Murchison and Nicol's Geological Map of Europe, reviewed, 137
Murray, Andrew, on Penella Remoræ, 287
Murray, Andrew, on a new Species of Echeneis, 287
Muscles, Electricity of, by Professor Matteucci, 371
Muscles of Animals, Composition of, by MM. Valenciennes and Fremy, 367
Muscular Fibre, nature of, by Professor Ellis, 370

Northern Drift, remarks on, by Mr John Martin, 209

Oyster and Oyster-beds of British Shores, by F. C. Eyton, 354
Ozone, 379
Ozonometers, 332

Panama, Passage through the Isthmus of, by a Canal, by F. M. Kelley, 360
Paradoxides in Altered Rocks of Eastern Massachusetts, by Professor W. B. Rogers, 301.
Paraguay Tea, 193
Patterson on Dredging Observations, 206.
Penella Remoræ, Description of, by Andrew Murray, 287
Phosphorus, Detection of, 381
Physical Geography, 382
Pichincha, Vegetation of, by Dr Jameson, 374
Plants, their use in the Economy of Nature, by Dr Asa Grey, 378
Progressive Development, 372.

Races of Man, remarks on, 39
Red Colour of the Sea, as caused by Organized Bodies, by M. Camille Dareste, 262
Reptilian Remains in Old Red Sandstone, 190
Rock Basons near Almorah, Upper India, 204
Rogers, Professor W. B., on Paradoxides in the Altered Rocks of Eastern Massachusetts, 301
Ross, Sir John, his death, 388
Royal Physical Society, Proceedings of, 162
Royal Society of Edinburgh, Proceedings of, 145
Russell, R., on the Storm of 6th and 7th February 1856, 243

Salmon, Report on Artificial Propagation of, by Sir William Jardine, 347
Scyllarus arctus, 178
Seaweeds, edible kinds of, 1
Seeds as affected by Salt Water, 375
Signals, transmission of, by E. O. W. Whitehouse, 332
Silicon, 191
Smith, Dr Alexander, on the Preparation of Sugar and Arrack in Ceylon, 253
Sorby, H. C., on the Terraces in the Valley of the Tay north of Dunkeld, 317

XUM

Stereognathus ooliticus, a Fossil Mammal, described by Professor Owen, 337
Storm of 6th and 7th February 1856, remarks on, by R. Russell, 243
Strychnia, action of, 385
——— detection of, 191, 386
Sugar and Arrack, preparation of, from Palms in Ceylon, by Dr A. Smith, 253
Symonds, Rev. W. S., on Transition Beds in Herefordshire and Gloucestershire, 239

Tantalite, containing Zirconia, 197
Terraces in the Valley of the Tay north of Dunkeld, by H. C. Sorby, 317
Textile plants, 195
Tides of Nova Scotia, by Professor Chevallier, 330
Transition Beds, in Herefordshire and Gloucestershire, remarks on, by Rev. W. S. Symonds, 239
Tubicolar Animals, described by Dr Wright, 313
Turkey, new species, from Mexico, 371
Tyrite, 198.

Urari Poison, action of, 383.

Vegetable Ivory Plant, 192
Verreaux, Jules, on Balæniceps rex, 101
Victoria regia, temperature of, 375
Voiglite, a new mineral, 196

Westmacott, Sir Richard, his death, 388
Wilson, Dr Daniel, on Displacement and Extinction among the Primeval Races of Man, 39
Wilson, Professor George, on Colour-Blindness, reviewed, 322
Wilson, James, Biography of, 106
Wright, Dr T. S., on Two New Actinias, 92
——— on the Reproduction of Cydippe pomiformis, 85
——— description of Two Tubicolar Animals, 313
——— on the Existence of Thread-cells in the Tentacles of Cydippe, 316

Yarrell, William, Biography of, 386

Zeizing, Professor, Neue Lehre von den Proportionen des Menschlichen Körpers, reviewed, 121
Zoological Intelligence, 177, 367
Zoophytes, New British, by J. Alder, causes of, 346

END OF VOLUME FOURTH—NEW SERIES.

NEILL & Co., Printers, Edinburgh.
